

SAHAN KAUSHALYA

INTERN SOFTWARE ENGINEER

Kosgama, Colombo, Sri Lanka | mkskaushalya@gmail.com | +94-787520742
sahan.tute.lk | linkedin.com/in/sahankaushalya | github.com/mkskaushalya

SUMMARY

Undergraduate in BSc (Hons) Eng. in Information and Communication Engineering with experience in full-stack software development, quality assurance and testing, cloud computing (AWS), version control, database management, DevOps tools (CI/CD, Docker), and UI/UX design. Currently seeking an Intern Software Engineer role to apply technical expertise and contribute to production-ready software projects while further developing practical skills in software development and operations.

TECHNICAL SKILLS

Cloud & DevOps: AWS (EC2, S3, IAM, VPC), GCP, Docker, Kubernetes, GitHub Actions, Linux, Bash Shell
Languages/Frameworks: TypeScript, Python, PHP, Java, SQL, R, C++, Laravel, React, Next.js, Flutter, Tailwind
Tools: Git/GitHub, Figma, Adobe XD, VS Code, Postman, MySQL, GitHub Copilot, JetBrains IDEs, Katalon
Other: UI/UX Design, Server & Network Administration, Automation, Graphic Design, Basic Electronics

PROFESSIONAL EXPERIENCE

SLTC Student Information ID Generating Application May 2024 - Nov 2024

- Role: Full-stack Developer, Testing, CI/CD, Deployment
- Technologies: Laravel, React, TypeScript, MySQL, Node.js, Puppeteer, Python, AWS EC2, GitHub Actions
- Created an SMS OTP-based data collection system for all students and produced 3000+ cards
- Outcomes: Ensured data accuracy via OTP; utilized Puppeteer for bulk ID generation and Python for PDF processing; Used GitHub Actions for automated EC2 deployments with a 95% success rate

Real-Time Landscape Contour Mapping System with Predictive AI (FYP) May 2024 - May 2025

- Developed a real-time system integrating a Kinect depth sensor and computer vision (Python, NumPy, Matplotlib, OpenCV) to generate and project dynamic contour maps onto physical terrain. Incorporated a GPT-4o AI model to analyze terrain changes and predict future transformations, such as land submersion.

EDUCATION

BSc (Hons) Eng. in Information & Communication Engineering Mar 2021 – Present

SLTC Research University | Meepe, Padukka, Sri Lanka

- Major in Computer Science, Engineering, Telecommunications, and Cloud Computing.
- Thesis on "Real-Time Landscape Contour Mapping System Using Computer Vision".

CERTIFICATIONS

- **Cloud Architecting:** Recognized for completing advanced coursework in AWS solution architecture and best practices, hands-on labs, and project work - **AWS Academy Graduate**
- **Cloud Foundations:** Completed foundational training in AWS services, architecture, and pricing models - **AWS Academy Graduate**
- **Linux: Introduction to Shell Scripting for DevOps:** Write and be able to read Bash scripts, and understand the fundamental components involved in Bash scripting - **Coursera**
- **Google AI Essentials Specialization:** Master generative AI to work faster and more strategically through effective and responsible use. - **Google**

ADDITIONAL INFORMATION

- **Languages:** English, Sinhala.
- **Soft Skills:** Problem-solving, decision-making, effective communication, adaptability, and leadership.
- **Volunteer Experience:** Active in the IEEE Sri Lanka Section and its societies and affinity groups, serving in executive committee and webmaster roles.
